## HILO SCORES ONE SCARE QUANTITY OF ANTITOXINE

Illness of a Portuguese That Proved  
to Be Not Serious.

Everything Running Smoothly—Awaiting Out-  
come of Delegate Loebenstein's Work—  
Beckley Comes in for Some Criticism.

(Special to the Bulletin.)

Hilo, Jan. 28.—Health matters have been running smoothly here for a week under the guidance of the Board of Health for Hawaii selected during Minister Cooper's visit. The "scavenger committee" has continued work and most of the places in Chinatown and Japtown have been whitewashed and placed in sanitary condition.

Representative Loebenstein has gone to Honolulu to confer with the Board of Health as to what should and what should not come to Hilo but as the situation there according to our last advice, is unchanged, except for the worse, it is not probable he will come back with any more knowledge of the subject than he carried away with him. The death of Mrs. Boardman caused some excitement here and is deeply regretted by those who were acquainted with her. That death more than anything else, perhaps, was deemed sufficient excuse for one of the leading business men to call a meeting of merchants at the engine house this morning, but it was sparsely attended.

The consensus of opinion was that the island of Hawaii should not be open to receive anything from Honolulu while the plague continues there. Many of the men do not want the mails to come and they especially object to freight of any character. Several merchants spoke and the tenor of their remarks indicated a lack of confidence in Beckley of the Kinai and anything in which he is in anyway interested. They admire the course taken by the officers and men on the Noenu but decried the actions and persistency of Beckley.

Yesterday a Portuguese employed in one of the large retail houses here was taken suddenly ill with pains in his groin and he developed a high fever. He was at once sent home and a physician sent for, but owing to a misunderstanding did not see the patient. The man's family sent for a Japanese doctor who reported the case as suspicious at the Sheriff's office. Doctors Grace and Moore were sent for and they pronounced the case not plague, but said they would give a final answer in twenty-four hours, which expires tonight. We do not believe it is plague.

At a meeting of the Board of Health held last night it was resolved to suspend all operations of a sanitary nature as a body until it was learned whether the members were to receive authority for their acts as a Board of Health. Dr. Russell remarked that the position of a member of the local Board was very much the same as the man who received instructions to do some sort of labor which required the use of his arms, but as he was a paralytic he could do nothing. The Board has received information that unauthorized freight and mail is being landed at other ports of the island and as they have no authority to stop it they decided to suspend work and wait developments. This throws this island open to receive any old thing your people want to send up.

In the merchants' meeting today Sheriff Andrews was endorsed by those present. In spite of anything the Honolulu papers may say the people here have confidence in him and will stand by him. Andrews says he will obey the orders of his superiors in Honolulu so long as he is Sheriff and when he does not do so it will be as a private citizen. Certain it is that at one of the early meetings held here he kept the obstreperous one in control. He has not been led by Mr. Wilson or anyone who is excitable during a crisis; Andrews did not lose his head for a moment.

The custom of sending foreign invoices to Hilo by way of Honolulu is causing some inconvenience to the importers, as the mails not arriving prevents their entering their goods.

The Courtney Ford and the Amy Taylor sailed this morning for San Francisco the former carrying a full load of sugar.

The Aztec may load her mules tomorrow for her trip to Manila. The stock was in poor condition when shipped. Captain Gale in an interview published in the Hawaii Herald states that the animals were green when shipped and that after a seven day storm in San Francisco they left with the germs of pneumonia in their systems. There were eleven dead before reaching here, another died as soon as landed and three have since died. The captain speaks favorably of transports coming here and says a coal pile is not needed.

The Roderick Dhu will sail for the Coast about February 10.  
Launch Lurline (Matson & Co.) founded here last Friday.

WEDDING STATIONERY, Engraved Cards, Embossing.  
H. F. WICHMAN.

Received From Pasteur Institute by  
Moana Yesterday.

Bad of Health Also Receives a Lot of  
Hoffkine Prophylactic From Washington—  
Fluids Sent to Cold Storage.

The Board of Health received by the Moana yesterday 100 bottles of antitoxine from the Pasteur Institute in Paris and a large quantity of what is known as the Hoffkine Prophylactic from Washington. The former is, of course, for use on plague patients, but according to the present outlook, there is not much chance of its being used for the people at the pest house are all getting better and no new cases are appearing. The prophylactic is for use on people who have been exposed to the plague. The following instructions for use of the fluid accompanied the shipment:

This fluid is purely prophylactic in character; is in no sense curative and should not be confused with Anti-pest Serum.

It should not be used on those already exposed to the infection of plague, but its employment should be limited to the immunization of persons or communities threatened with the disease.

The prophylactic is a toxin and should be administered with it to contract the disease prior to the production of its antitoxic effects. In a week or ten days after its use this antitoxic effect is produced and renders him immune to the disease. The immunity thus conferred lasts an undetermined time, probably several months and may be increased by a second or third treatment. The inoculation is followed by a reaction.

The fluid should be injected hypodermically into the loose connective tissue of the back, arm or other convenient regions and with the usual precautions employed in such operations as sterilizing the area by some antiseptic solution and by boiling the syringe.

In view of the importance of the subject the Marine Hospital Service requests that you report the effect of the prophylactic to the Director of the Hygienic Laboratory of the U. S. Marine Hospital Service, Washington, D. C.

Some of the antitoxin and prophylactic has been retained in the ice box of the Board of Health laboratory, but the most of it has been sent to the cold storage department of the Hawaiian Electric Co. as it is necessary to keep the fluids at a temperature of about 40 degrees F.

### DIVING AT THE WRECK.

Yesterday the divers of the marine railway were operating at the wreck of the barkentine William Carson. John, the native diver, went down and inserted the air hose in the vessel. This was to test the lifting power the apparatus on the vessel. There proved to be too free an escape of air for any practical effect. The air came up through the water in bubbling volume. Alex. Lyle afterward descended and closed a cabin light that was supposed to be the principal vent for letting out the air. He made a visual examination of the hull, finding it seemingly all right with the exception of the damage from the collision. The water was sixty feet deep from the forward rail. So clear was the water that the diver could not only see his hose and lines all the way to the top, but could plainly discern the workmen on the stage at the surface and tell what they were doing.

### NOW DOYLE'S WORKING.

Chester Doyle has the disinfecting and fumigating plant at the drill shed camp in full blast today. He began bathing his Japanese wards at 9 o'clock and by 12 had put fully three-fourths of them through the operation. Behind a board screen are tubs of hot water diluted with carbolic acid wherein the people are required to wash themselves. Then Mr. Doyle, perched on the angle of the screen, gives them a good douching of cold water from a garden hose. After each batch of, say, ten bathers the acidulated water in the tubs is changed. As the people leave the bathing place they go to the fumigating shed, where they receive clean and fumigated clothing to replace the garments they had put off.

### Charged With Vagrancy.

H. Kawasamahi was arrested yesterday on the charge of violation of section 370 of the Penal Laws, relating to vagrancy. It is alleged that Kawasamahi was found in the Arlington billiard parlors, Hotel street, after that place was closed last evening. The case has been set for the 6th inst.

The Board of Agriculture is meeting this afternoon.

## HARTWELL IS IGNORED.

(Special Correspondence to the Bulletin.)

Washington, Jan. 20.—The statement published by the Bulletin that A. S. Hartwell, special agent of President Dole was properly called down, at a dinner given by him, for remarks concerning annexation, is a statement of fact your local official people to the contrary notwithstanding. Prince David, who is likely to be in Honolulu soon, can confirm the statement and give additional incidents in connection with Hartwell's discomfiture.

Hartwell made a big mistake in coming to Washington and now he is fully aware of it. He may be a General and a self important man in Honolulu, but he is far from it in Washington. Hartwell is ignored here. He feels it and on more than one occasion has said that he wants to go home. He has said that had he known how he would be received in Washington he would not have come and actually cried over it one night after dinner when he was feeling particularly dubious.

When Col. Parker returned to Washington after his western trip he was invited to a reception at the White House. Hartwell and W. O. Smith were ignored as they

have been at all social functions. Congressman Hitt has told Col. Parker and Prince David that it was a mistake for Hartwell to come here. Congressmen knew why he came and would not be influenced by him. Parker repeat d this conversation to Hartwell who wanted to know if it could be true. He wanted to leave then and there saying that the statement that private matters demanding attention would be a good excuse.

The influential men of Washington know Hartwell is working for Mr. Dole's personal interests. He has stated to Parker and Prince David that he came here to work for Dole. Members of Congress know how to take him. They consider it an outrage that Hartwell should be paid from public funds to work for a candidate whom the people have not apparent necessity for.

Congressmen suggested that the people of the islands should bring an injunction against the Dole government to prevent Mr. Hartwell from receiving public funds when his mission is merely one of personal campaign for President Dole.

### KAUAI NEWS NOTES.

The steamer Keaouha came in from Kilauea this morning with a load of sugar consigned to various parties. Purser Clapham kindly furnished the Bulletin with the following notes of the doings on Kauai:

"There was a great excitement at Makaweli Wednesday. A large whale, 45 feet in length, got in too far and was stranded. Frightened by the contact with the sand the whale thrashed about until it became blinded by the sand and, instead of making any headway out to sea, it worked in closer to shore. The fishermen for miles around were soon on the scene and soon made an end of the whale. Hundreds of people went to the beach to get a view of the monster. Among these were the children from the schools near by.

"The Kinai did very quick work at loading sugar in Makaweli. According to Captain Freeman she was to sail today for San Francisco with a full load.

"There were 147,500 bags of sugar on Kauai when the Keaouha sailed last evening.

"The James Makae and Walealea put a load of sugar each into the Robert Lewers on Wednesday last. Captain Goodman stated yesterday that he had 17,000 bags of sugar aboard and that he would be able to sail for San Francisco early next week.

"The Nihau was at Koloa when we left yesterday. She will take a cargo of sugar at Kilauea.

"The weather on Kauai has been fine for several days."

The Keaouha brought five or six good sized boxes of clothes from Mrs. Ewart of Kilauea. They are addressed to the Hawaiian Relief Society in care of Miss McIntyre and are sent to relieve the wants of the people made homeless by the fire in Chinatown. Ladies from all over Kauai and those of Kilauea in particular assisted in making the clothes.

### Pilikia on the Hall.

The W. G. Hall sailed for Kauai ports yesterday with a half load of freight and a half crew. Previous to departure yesterday half the native sailors refused to be confined aboard any longer. This of course will make it very hard for the Hall and she will not be back until next Wednesday or Thursday.

### Will Go Into Quarantine.

The steamer Mikahala will go into quarantine outside late this afternoon on account of having been taken on the marine railway for repairs. Captain Pedersen will be accompanied by his wife. The Mikahala will very likely resume her trips to Kauai.

### Flea Bite and Plague.

Sydney, N. S. W., Jan. 25.—A wharf laborer has been stricken with the bubonic plague, and the attending doctors are of the opinion that he was inoculated with the disease through the bite of a flea.

### TO CURE A COLD IN ONE DAY

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. W. Grove's signature is on each box. 25 cents.

### DON'T PASS OUR OPERA GLASSES

for the World. They're made by Le Maire. "Nuff said." H. F. WICHMAN

### THE CRIMINAL CALENDAR.

Clerk Henry Smith has completed the criminal calendar for the February term with the following 28 cases in addition to those previously published:

Foreign Jury—Lau Wai Guck and Kim Soon, assault with weapon; Chun Tai, larceny 1st degree; Isadore Issa-bet, violating section 100 penal laws 1897; C. H. Mann, larceny 2d degree; Wing Wo Tai, Chuck Tong, manager, violating section 1507 penal laws; Wing Wo Chan, Kat Poo, manager, same as last; Shisaku Doniski, larceny 2d degree; Millie Lancaster, assault and battery; Ah Nee, larceny 2d degree; Jack Maguire, perjury; Geo. Cavanaugh, perjury; J. Banavitz, manslaughter 1st degree for shooting a Portuguese boy; O. Herriek, larceny, second degree; O. Lewis and F. Turk, violating shipping license law; John Sylva, larceny 2d degree; W. H. Pain, common nuisance for laying street railway track against government orders; Lo Kam, vagrancy; Geo. Piggott, burglary; Mow Kong, violating section 3B, Act 34, laws 1898; Ah Hang, larceny 2d degree.

### HAWAIIAN JURY—MAKAWELI, larceny 2d degree; Komolihili, larceny 1st degree; Geo. Houghtaling, selling liquor without license; Keawe, distilling liquor; Lelaolaha, assault and battery; Joe Kaula, perjury; Geo. Houghtaling, perjury.

### MORE WRETCHED VANDALISM.

The offer of a reward of \$25, by the Minister of the Interior, for the arrest of anyone concerned in the recent uprooting of cocoanut plants along the Beach boulevard has failed even to prevent more of the disgraceful vandalism. There is on view in the Agricultural office a cocoanut seedling chopped off close to the ground, together with the seed itself broken open as if the guilty scamp had been seeking the milk in the cocoanut. As the seedlings had been coming on beautifully, this dastardly sort of thing is very discouraging to Commissioner Haughts and Secretary Wray Taylor, who took pains with the planting and then the tending of the growths.

### Extreme Cruelty.

The man in charge of the large pasture near the Kalihi detention camp complained to Deputy Marshal Chillingworth that a Hawaiian lad had killed a colt at his place yesterday by tying the poor animal to a tree and then lashing it until the poor thing fell exhausted in its efforts to get away. It seems that the boy has been in the habit of lassoing horses in the pasture and riding them about without the consent of the owners. The colt he lassoed yesterday was choked so badly that it fell on a rock and was killed. The boy will be arrested. People of the locality from which he hails are anxious that he be put into the reform school.

### Custom House Inspectors.

Geo. W. Klester, M. J. Scanlon and E. A. Jacobsen are the three district inspectors for February. Mr. Scanlon is the boarding officer, while Messrs. Klester and Jacobsen will alternate on the night watch. The discharging inspectors are as follows: J. P. Howatt, H. Kruger, L. Gay, E. C. Miller, R. Henderson, C. K. Spencer, Dan Vida and R. J. Taylor.

## ANOTHER DAY OF PROMISE

Last Night's Death Carefully In-  
vestigated By Physicians.

Work of Fumigating Going On at All the  
Detention Camps Tearing Down More  
of the Chinatown Shacks.

2 P. M.—No cases today. Wong Chin, male Chinese, aged 23, died at the pest house of the Chinese hospital yesterday afternoon. A post mortem was held and the body cremated, although positively no signs of plague were found. Slides were made, but examination by both Drs. Wood and Garvin did not show a single bacillus. Five culture tubes have been treated with matter from the spleen and, if these give no plague bacilli, there will, of course, be no doubt whatever. Pneumonia of a type that closely resembles that found in plague cases, was clearly demonstrated.

Wong Chin was taken sick at the Pantheon stables Sunday. He was told to go home but, having no place to go to, went to the same house on Wyllie street that his friend Quon Fat Man went to and died. He must have slept out under the bushes for there was a guard on the house. Monday he went to the Chinese hospital. There were no suspicious symptoms until yesterday when he succumbed suddenly. As the Chinaman had been associated with Quon Fat Man it was deemed best to cremate the body. This is a summary of the statement made by Dr. Wood today.

### Walakamilo Camp.

Superintendent Wilson and his men have finished their work at the camp. Two thousand people have been bathed, their clothes fumigated, their apartment at Camp Jones for the moment. There are in all 5,600 people at the camp so that not half the number has been attended to so far. There is not very much sickness in the camp. Four nurses are now on duty in the hospitals. The guard house has been completed and some people are already thinking over their sins in its cells. None of these are from the detention camp.

### Y. M. C. A. at Camp Jones.

The Y. M. C. A. has organized a de-entertainment will be arranged every day by the N. G. H. Col. Jones has very generously offered his cooperation in the work. The large tent used in the New York Volunteer camp was sent out this morning with papers and magazines and a number of books from the library to be circulated. An organ was sent to be used in song services. Entertainment will be arranged every evening, talent from the city and in the camp having volunteered to take part. Westervell will give a stereopticon entertainment Saturday night.

### In Chinatown.

A corps of men are busy today tearing down the sheds and lean-to back of the buildings in the block bounded by King, Nuuanu, Hotel and Smith streets and those back of the Wing Wo Chan and Wing Wo Tai buildings. The work is being very thoroughly done. Houses disinfected and have been segregated in Fowler's yard condemned yesterday by the Board of Health. These will be burned by the fire department tomorrow.

### Dr. Garvin.

Some time ago Dr. Garvin was detailed by the Board of Health for duty at the Kalihi camp. It has been found that the work at the camp is so arduous that the men out there cannot possibly do it all. Dr. Garvin will go out today or tomorrow and, it is probable, Dr. Davis, now at Kalihi, will be as the furniture and valuable house furniture of Hoffman's absence on Tantalus Dr. Garvin is attending to the work at the pest house.

### Fumigated Household Goods.

Prof. Ingalls went to the Boardman premises with his corps of assistants this morning and there fumigated the recently erected shed in which some of Appraisers are also busy with the nishings had been placed previous to setting fire to the house in which Mrs. Boardman lived. Some of his men are at work in the Wing Wo Tai and Wing Wo Chan buildings on Nuuanu street.

### Death at Kawaiahao.

Elizabeth Nabale, aged 10 years, died at Kawaiahao Seminary this morning. The patient was attended by Dr. Miner. As the cause of death was said to be pneumonia a post mortem was held at the undertaking parlors to which the body was taken. There were no suspicious symptoms.

## The 1895 Claims Are Ordered for Settlement

President Dole informed the members of the press today that the Minister of Foreign Affairs had received a communication from the United States Government, through Mr. Sewall, Special Agent, in regard to the British, Portuguese and Danish claims. It intimated that those claims, which arose out of the suppression of the insurrection of 1895, have been referred to the Hawaiian Government "for investigation, determination and payment."

## RUSHING WORK ON WHARF

Cotton Brothers & Co. are not letting barnacles grow on their contract for building the wharf and warehouse out the channel. They had no sooner delivered the plans and specifications to the Government on Monday morning than they began looking up material for construction. It was a foregone conclusion that, if the work was to be done in time to be of greatest service, this firm alone could figure on the job.

The assembling of the material is progressing. This morning the contractors were staking out the site. It will be seen from the Cabinet meeting proceedings that Commander Merry has deferred to the Government's views regarding location. Mr. Rowell, Superintendent of Public Works, is having trestles put up to carry the pipes for the dredging.

Eighty feet of the width of construction will be warehouse and the remaining forty feet wharf, the length being 400 feet. There will be nine openings in the warehouse front, the doors to have patent hinges.

## FIRE LOSSES DISCOUNTED

Minister Young reported to the Executive Council this morning that Commander Merry had agreed to the desired change of location of the channel-side wharf, which will place the end of it 110 feet away from the Heanani boat-house.

Minister Young also reported on the communication of the Board of Health, recommending an appropriation of \$2,500 for reimbursing firemen for the loss of effects in recent fires. He had been informed by Commissioner Andrew Brown that the firemen's losses would amount to but a very small portion of \$2,500. The Minister was directed by the Council to ascertain the actual losses. Any question of extra pay must be referred to the Legislature.

Through the Minister of the Interior, a copyright was granted to Thos. G. Thrum for his Annual for 1900.

### Board Dissolved Into Splinters.

A late note from Hilo says: "The situation is easy here now as we see by the papers you folks are determined to keep up the quarantine. Our 'Board of Health for Hawaii' disbanded last Saturday evening. Mails had been landed on the other side of the island, contrary to orders of the Board. The Sheriff came on the scene and stated, in answer to queries, that he owed allegiance to the Honolulu Board of Health and the Attorney General first, so the Board for Hawaii nel thought there was little use passing motions and resolving things without an executive and quietly, on the top of a motion and dissolved itself into its usual number of splinters and went to its beguiling several vocations. It dreams untroubled by plaguey speculations."
